SECTION: 01

Logo

Standard Process

Logo

The evolved Standard Process logo embodies a balance between our rich 90-year heritage and our innovative vision of the future. The design refines the familiar “SP” monogram into a mark that connects our agricultural roots with our continued pursuit of advancement in whole food nutrition.

The elemental forms within the monogram reference the silhouettes and vein structures of plant life, symbolizing growth, vitality, and the natural ingredients at the heart of our work. These shapes dynamically work together throughout the mark to convey momentum, transformation, and synergy between nature and science.

Paired with a clean, timeless wordmark, the logo brings clarity, scalability, and consistency across applications while retaining the bold unmistakable presence that has long defined the Standard Process brand.

Logo System

Vertical Lockup

This lockup is our preferred mark for visual impact and simplicity, letting the SP monogram take the lead and establishing a minimalist signoff with the Standard Process name. Ensure that the brand name is legibile when using this logo lockup at small sizes.

Monogoram

The monogram may be used as a short-hand brand mark when the Standard Process name has previously been established within a touchpoint. It may also be used sparingly as a large-scale supergraphic.

Vertical Lockup

Monogram

Logo Colors

Our logos should always be depicted in one of two brand colors, depending on the value of the background. Use *SP Green* logos on light backgrounds as the primary logo color treatment, and *Sprout* logos on dark backgrounds as the secondary treatment.

● PRIMARY LOGO COLOR: SP GREEN

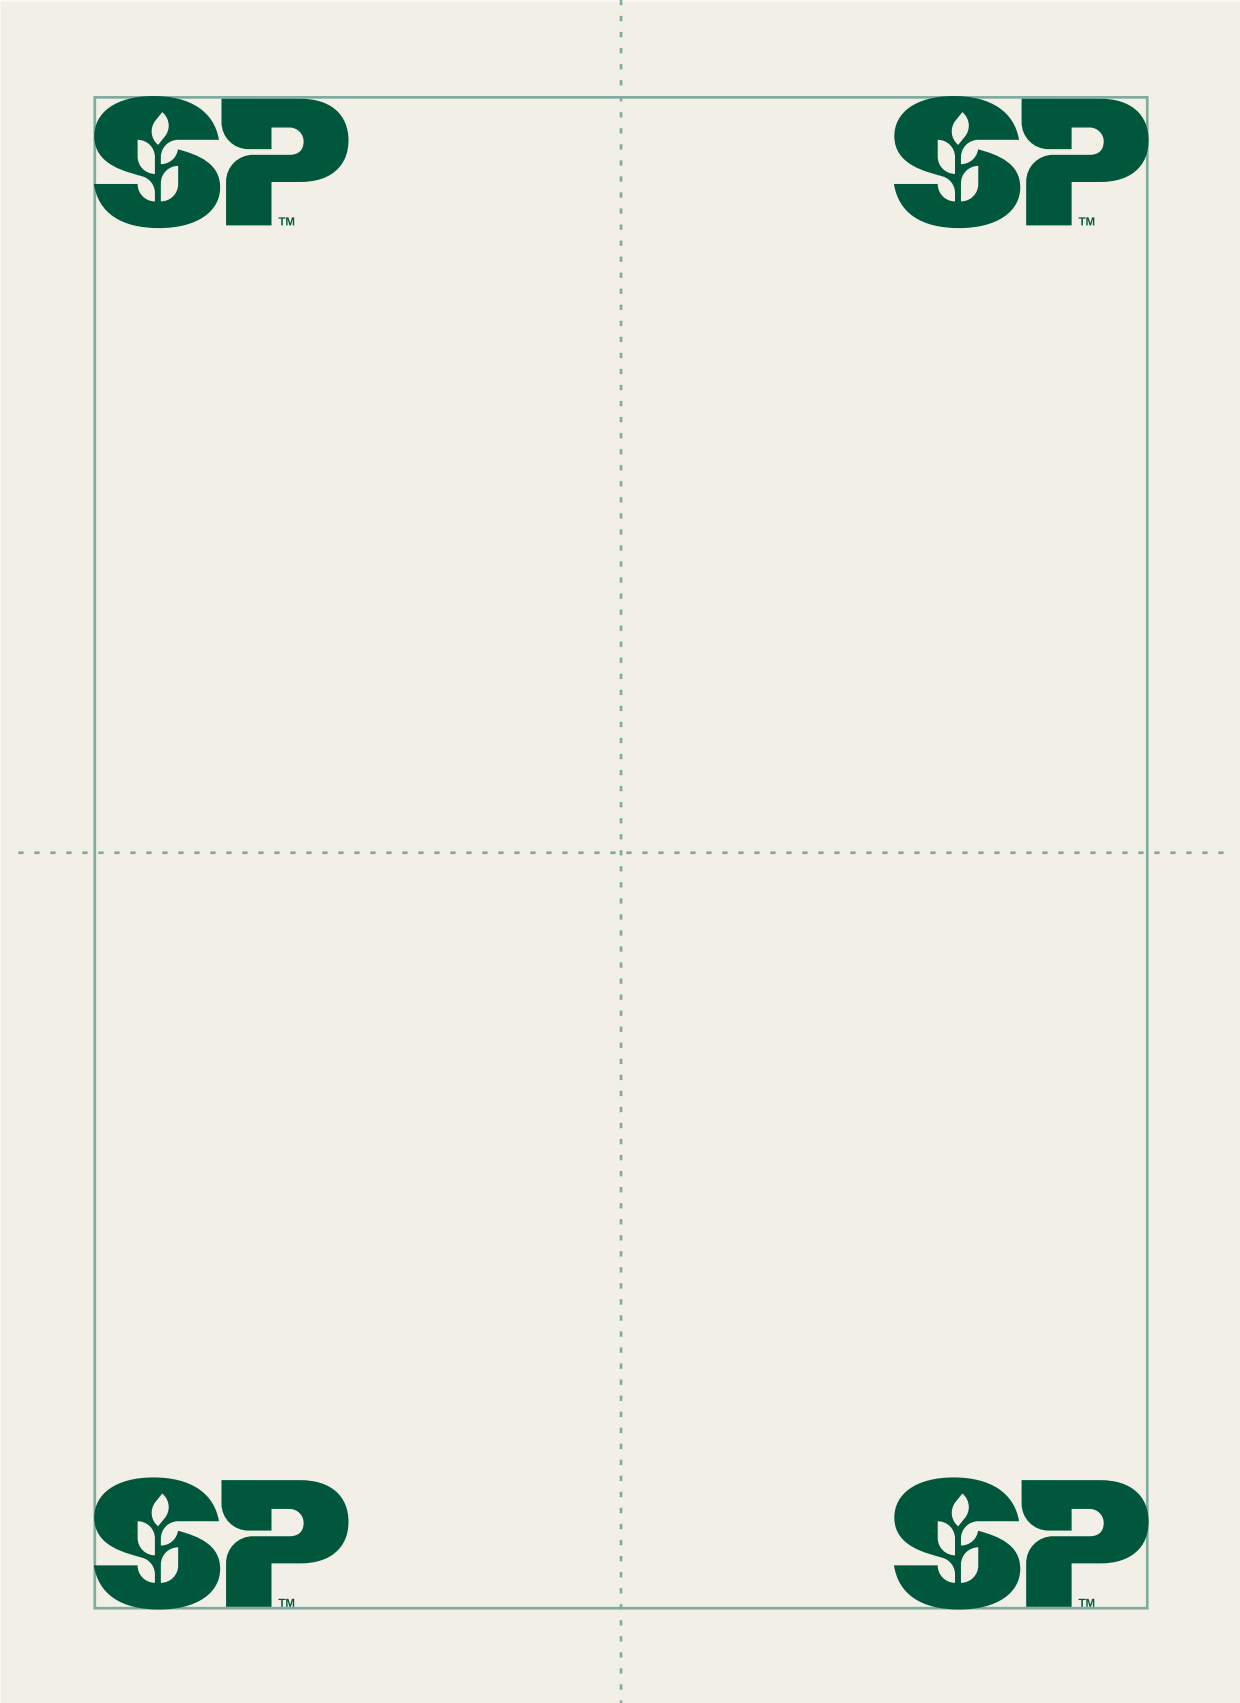

● SECONDARY LOGO COLOR: SPROUT

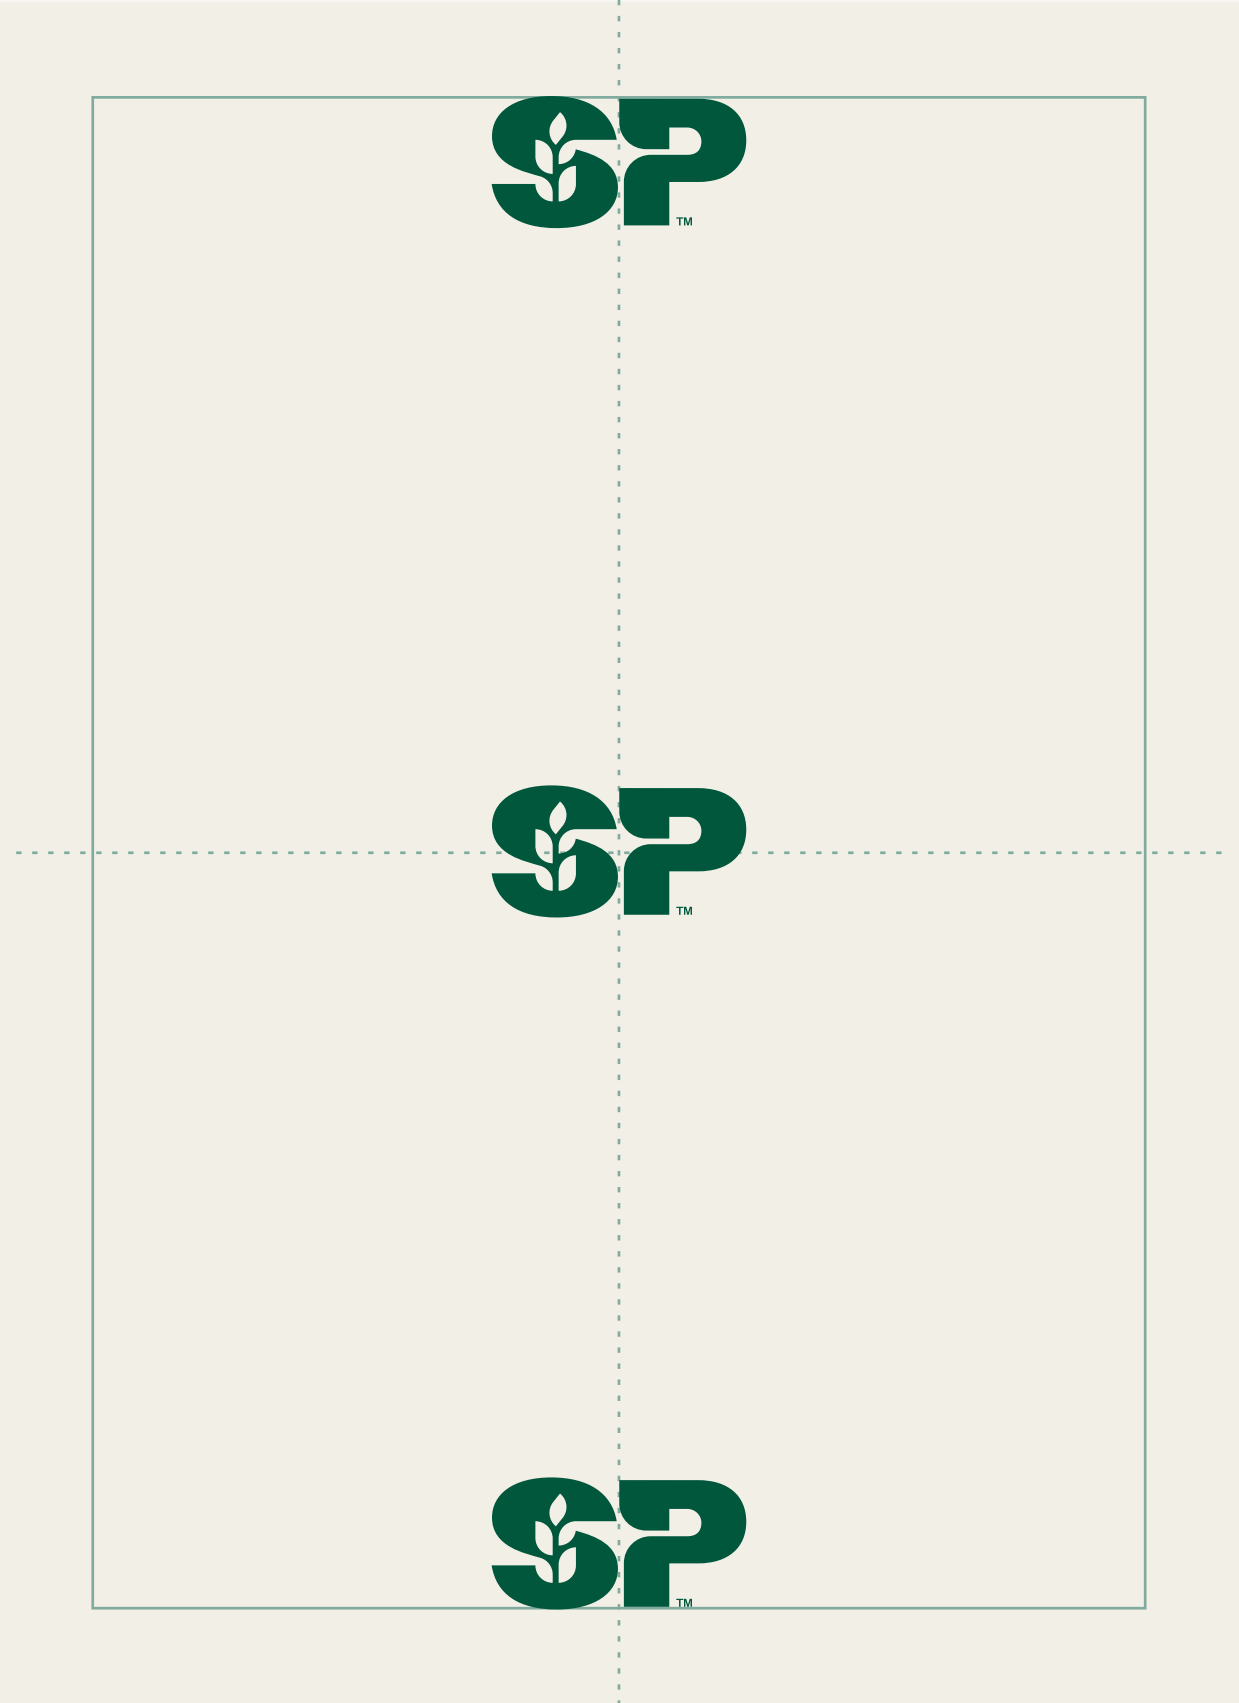

Logo Placement

Our logos are built to work effectively in a wide array of layouts and orientations. While the placement is flexible upon the needs of each individual touchpoint, we try to stick to two main approaches: Aligning to a corner or centering to the top, middle, or bottom of a layout.

CORNER ALIGNMENT

CENTER ALIGNMENT

Logo Integrity

There are a few simple rules we follow to ensure our logos maintain prominence and legibility. Logos should be surrounded by generous clear space whenever possible. Use the ‘SP’ height as a reference to determine sufficient clear space for each logo in different design environments. Apply this same standard across all logo lockups.

In addition, each logo lockup should not be depicted smaller than the minimum heights listed.

SECTION: 02

Color

Color Palette

Our colors play a key role in shaping our visual tone and expressing the brand’s deep connection to nature, energy, and vitality. We use a focused, yet flexible, palette inspired by the diversity and richness of the natural world.

SP Green anchors our core palette as the primary brand color, with *Sprout* and *Sandstone* serving as contrasting complements. Together, they create a harmonious balance of grounded warmth, freshness, and natural vibrancy. These three colors should be featured most prominently across all visual communications, taking the lead in any holistic touchpoint.

Beetroot, *Nightshade*, *Copperleaf*, and *Basalt* act as accent tones, adding variation, depth and visual dimension. These hues should be used sparingly and with purposeful intent. They are best incorporated as backgrounds and accents in secondary touchpoints such as interior pages of presentation decks and collateral, below-the-fold sections on web pages, or social media assets.

HEX or RGB values should be used for all digital applications while CMYK or PMS values should be reserved for printed materials.

Brand Color

SP GREEN

HEX	#00573D
RGB	0, 87, 61
CMYK	87, 13, 72, 56

Color Contrast

The accompanying chart illustrates how to maintain the highest contrast and legibility when placing primary content over our variety of brand colors. Use *SP Green* foreground content over our lighter tones and *Sprout* or *Sandstone* foreground content over our deeper tones.

Print
Sprout should be the primary color for *SP Green*, *Beetroot*, *Nightshade*, *Copperleaf*, and *Basalt* backgrounds. *Sandstone* should be used as the secondary color.

Digital
Sprout should be the primary color for *SP Green* backgrounds. *Sandstone* should be the primary color for *Beetroot*, *Nightshade*, *Copperleaf*, and *Basalt* backgrounds.

Color Tints

Tints of our brand colors may be used in small doses to provide a subtle shift in contrast to aid in hierarchy or separation in functional graphics like UI elements, interactive states, presentation charts and tonal treatments.

Do not use tints on their own in place of their associated brand color. They should only be used as supporting treatments connected to their full-value brand color.

Sandstone	50% TINT	HEX RGB CMYK	#F8F7F2 248, 247, 242 2, 1, 4, 0
Sprout	80% TINT	HEX RGB CMYK	#BFEA97 191, 234, 151 30, 0, 59, 0
SP Green	90% TINT	HEX RGB CMYK	#326652 50, 102, 82 87, 36, 74, 25
Beetroot	90% TINT	HEX RGB CMYK	#8E3759 142, 55, 89 34, 94, 44, 14
Nightshade	90% TINT	HEX RGB CMYK	#55466A 85, 70, 106 72, 79, 32, 17
Copperleaf	90% TINT	HEX RGB CMYK	#BA6A4D 186, 106, 77 17, 71, 78, 4
Basalt	90% TINT	HEX RGB CMYK	#7E7C74 126, 124, 116 51, 44, 51, 11

Color Don'ts

Maintaining a balanced and thoughtful approach to color is crucial in preserving the quality and consistency of our visual language. The following examples illustrate a few color treatments to avoid.

DO NOT depict the logo in colors other than *SP Green* or *Sprout*.

DO NOT use multiple accent colors within one layout.

DO NOT compromise legibility.

DO NOT use colors outside of the brand palette.

SECTION: 03

Typography

Aa
Bb

Typography

Typography is a cornerstone of the Standard Process visual identity, shaping how the brand communicates its distinct voice and tone across every touchpoint. Our type system balances a thoughtful academic quality with precision and clarity, reflecting the brand’s deep expertise, enduring trust and innovative perspective.

IvyPresto Headline is our primary typeface. Its timeless style, refined serif details, and deliberate rhythm convey both intelligence and warmth, bringing a considered and grounded quality to all brand communications.

Owners Text is our secondary typeface, chosen for its meticulous quality and versatility. Its clean, structured geometry provides a contemporary and highly functional counterbalance to *IvyPresto* for supporting copy.

Both *IvyPresto Headline* and *Owners Text* can be downloaded from fonts.adobe.com.

Using Type

IvyPresto Headline is used as our primary typeface for headlines and prominent display copy, while *Owners Text* is used for supporting messages, long-form copy and small-scale details. Italic styles of each font may be used minimally in moments of particular emphasis or for inline titles and names.

Universal Alts

In instances where universally accessible fonts are required (such as email), ***Times New Roman*** should be used in place of *IvyPresto Headline* and ***Arial*** should be used in place of *Owners Text*. All other typographic styling and treatment should remain the same.

From soil to science, we advance whole food nutrition as the true foundation of health and clinical care with our nutrient-dense, whole food supplements.

EXPLORE OUR SUPPLEMENTS

Type Guidance

We’ve defined a few simple specifications for establishing consistency, impact, and legibility when setting type. Follow these settings for the most effective approach to different typographic use cases.

Always establish a clear hierarchy between headlines, subheads, body copy, and detail text by choosing distinct point sizes that create visual contrast and organizational structure in the layout. Ensure that the smallest point size within a composition is legible in the medium of that touchpoint (digital or print).

SMALL-SCALE DETAIL COPY

Typography Don'ts

While our typographic approach is designed for flexibility, there are a few treatments we try to avoid to maintain the visual integrity of our messaging. These examples illustrate a few of these watchouts.

DO NOT set headlines in All-Caps.

DO NOT set headlines in All-Italics.

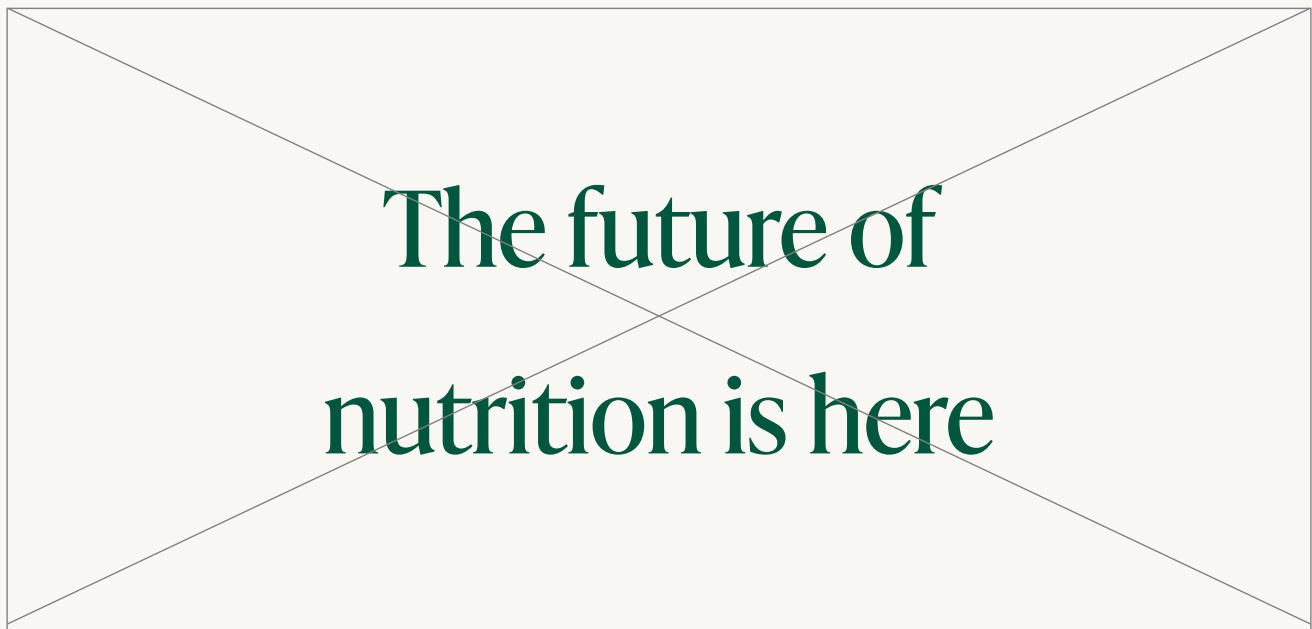

DO NOT inverse the hierarchy between IvyPresto and Owners.

DO NOT mix IvyPresto and Owners within the same text block.

DO NOT alter tracking (letter spacing).

DO NOT alter leading (line spacing).

SECTION: 04

Photography

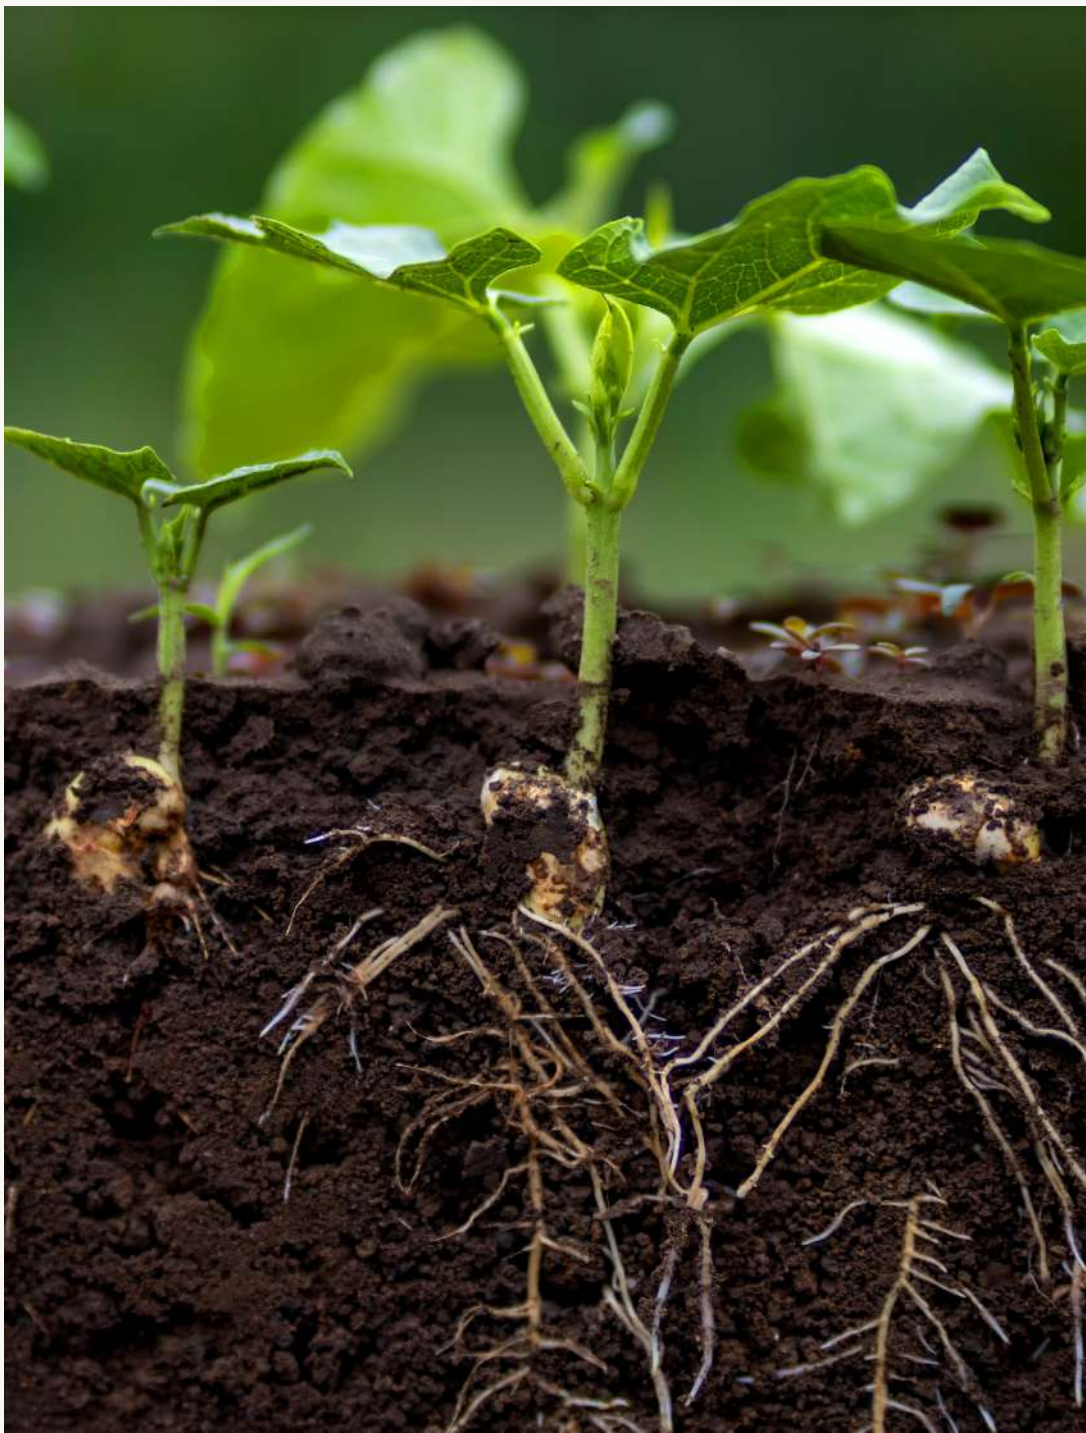

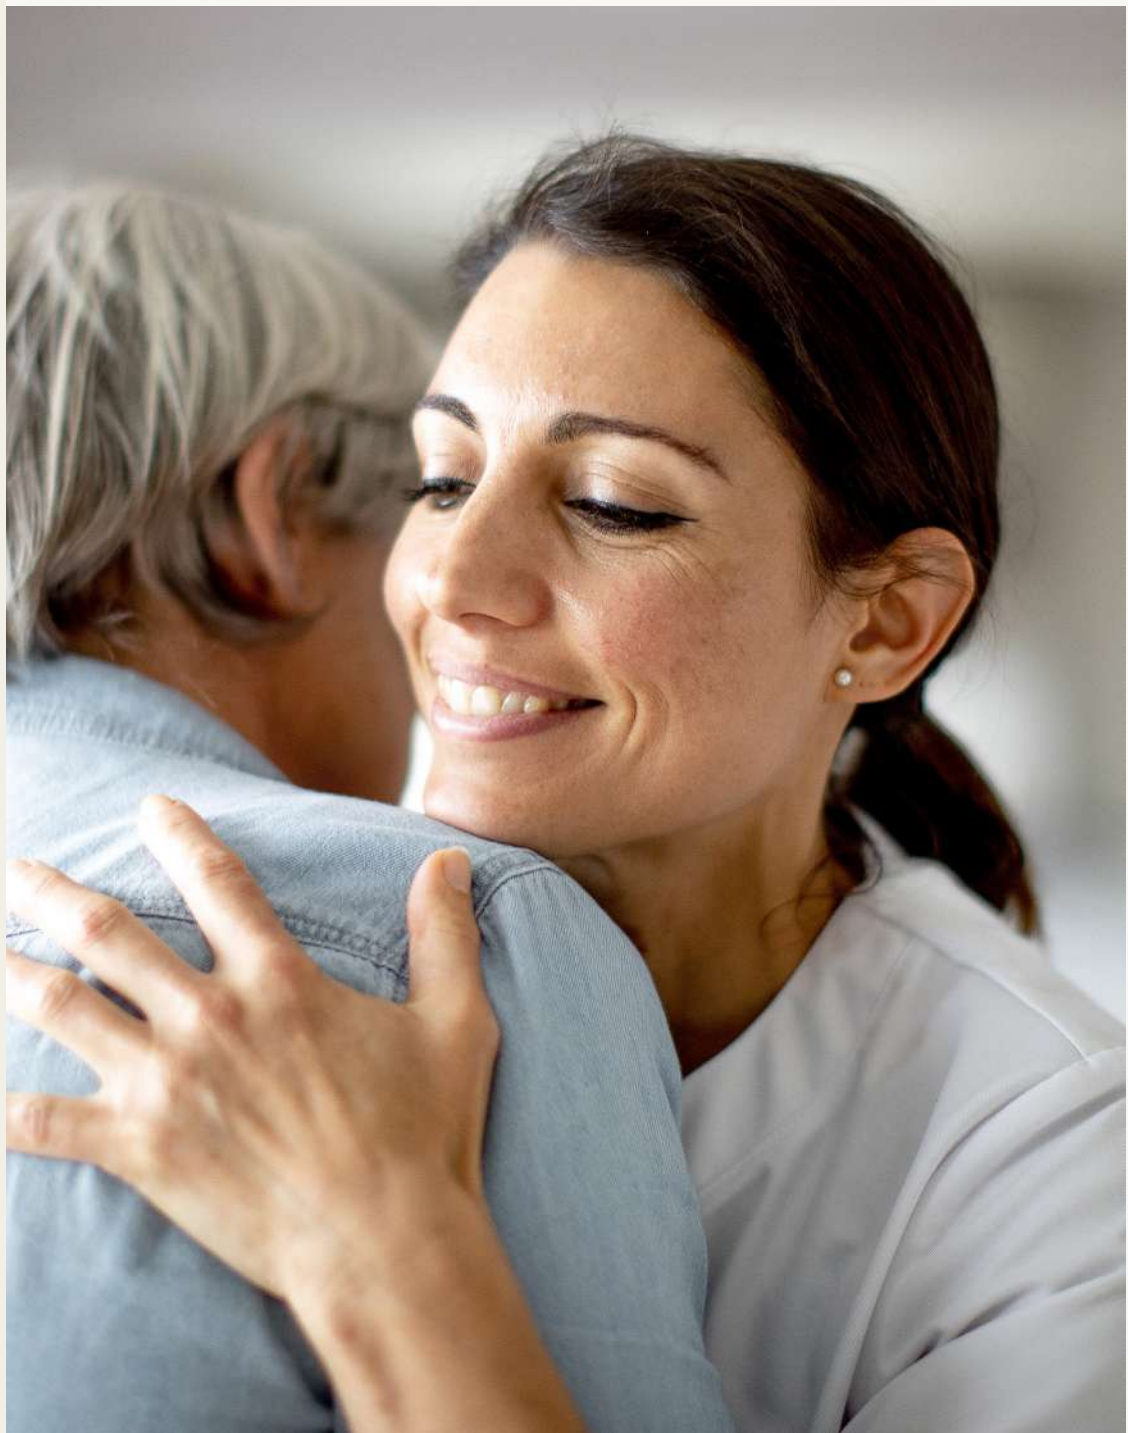

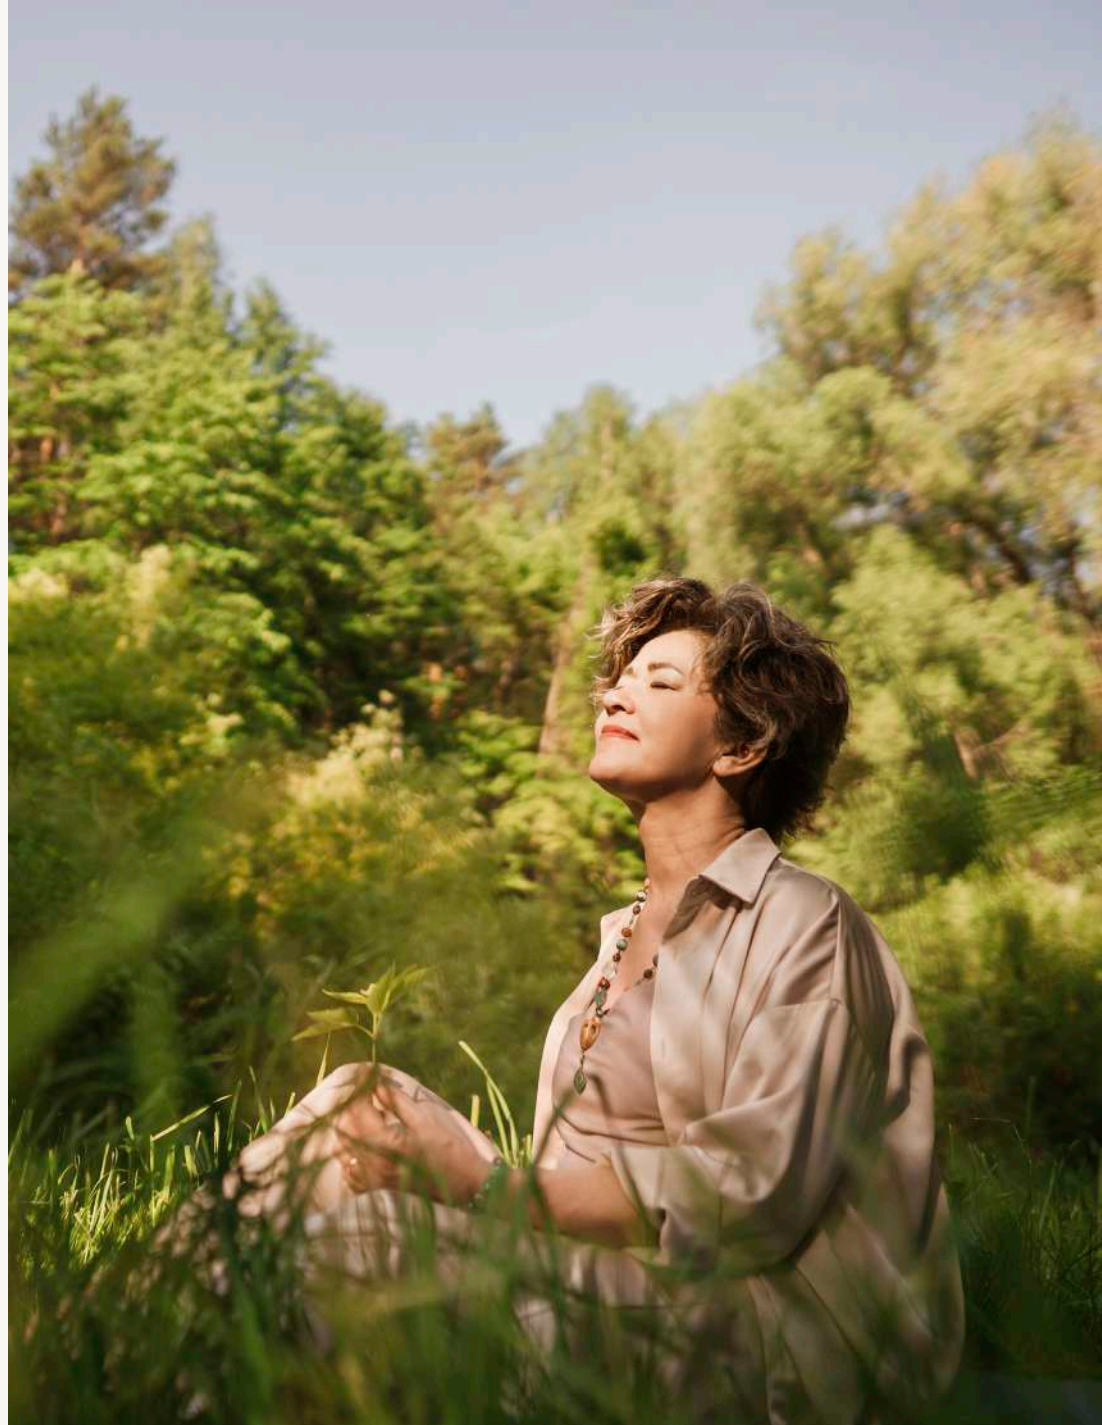

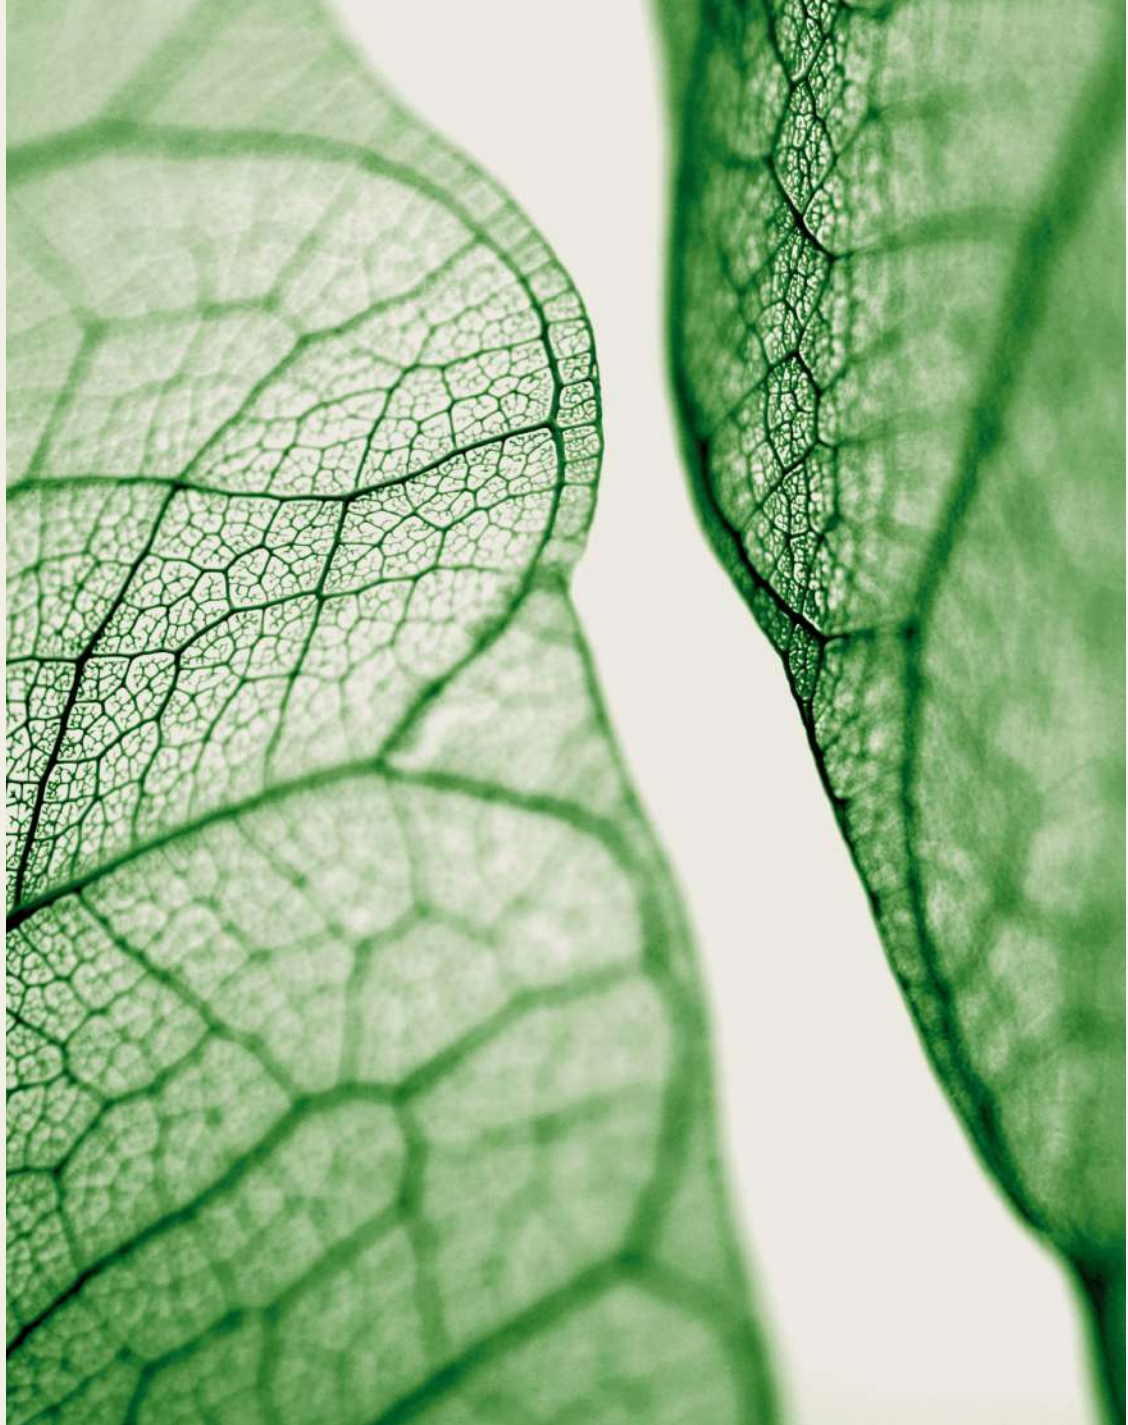

Photography Style

Our photography brings our story to life through a lens that is both empirically innovative and deeply rooted in nature. It expresses the unique balance between scientific precision and organic vitality that is unmistakably Standard Process.

Every image should feel honest, intentional, and vibrantly alive. We use *Science & Nature* photography to highlight the richness of our ingredients and integrity of our process, while *People & Lifestyle* images represent the humanity behind our work and the positive impact our products have on our audience's health and wellness.

Note that any photography from this document used in public-facing communications must be appropriately licensed prior to use.

Purchased & licensed images can be found on Brandfolder under Brand Evolution Photography:
<https://brandfolder.com/s/n838rsrkpgmknxwvqw44vj>

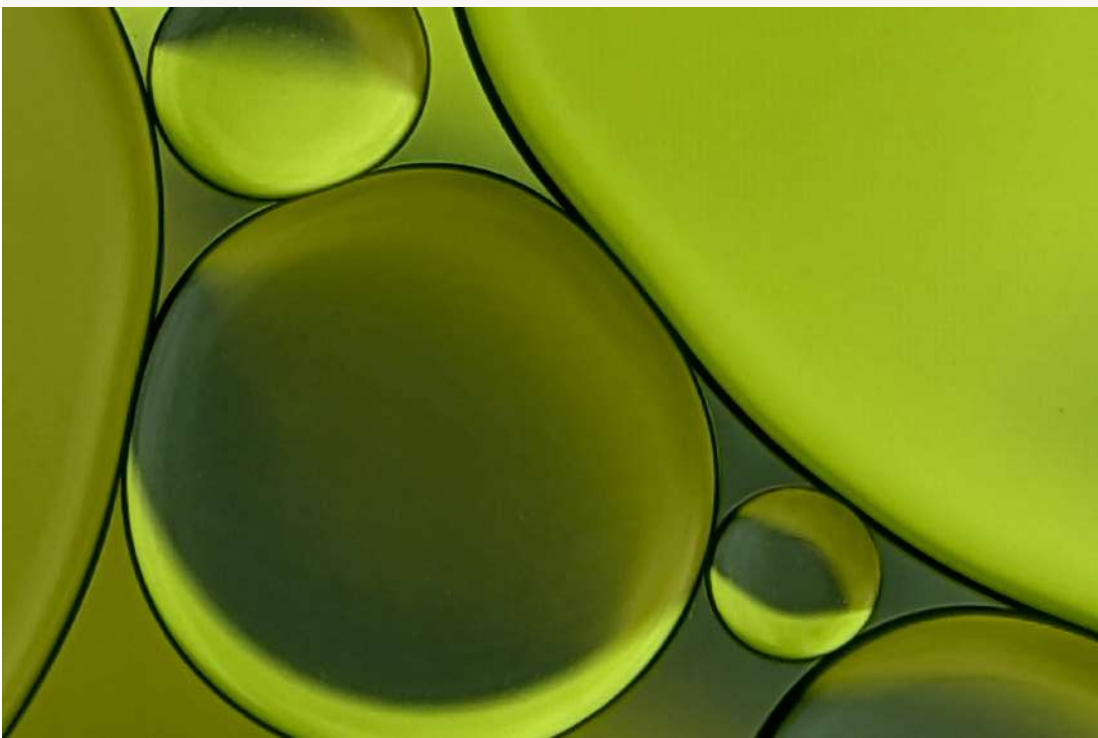

Science & Nature

Science and nature photography captures the intersection of research, cultivation, and the inherent intelligence of the natural world. These images should highlight the rigor and empirical innovation behind our processes while celebrating the organic beauty and diversity of our ingredients.

We use dynamic perspectives of texture and close-up details to reveal the hidden rhythms and complexities of nature through a scientific lens. Lighting and color should feel clean, dimensional, naturally vibrant, and full of life. Cropping should be done with intentionality, either framing key subjects or creating unexpected, immersive compositions.

Note that any photography from this document used in public-facing communications must be appropriately licensed prior to use.

Purchased & licensed images can be found on Brandfolder under Brand Evolution Photography:
<https://brandfolder.com/s/n838rsrkpgmkxwvqw44vj>

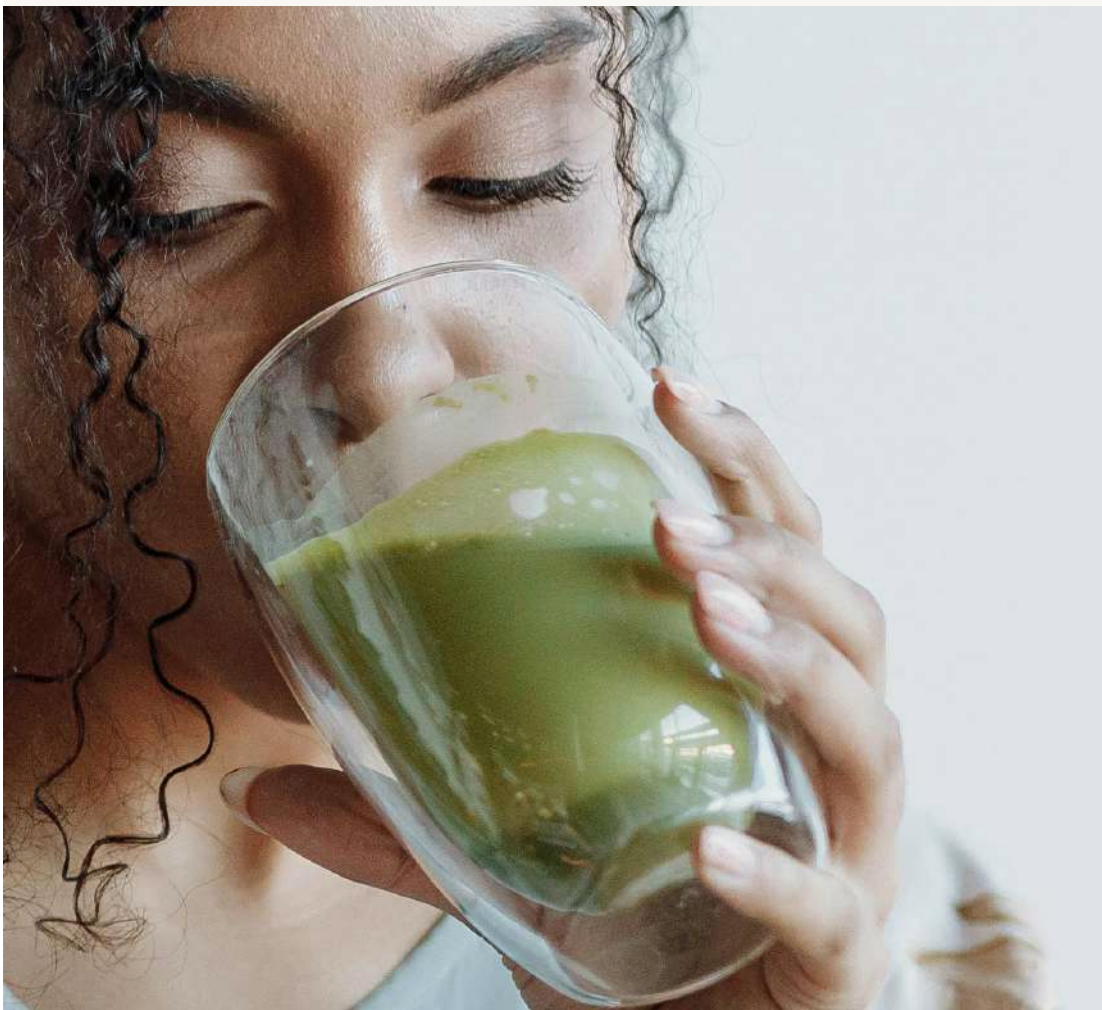

People & Lifestyle

People and lifestyle photography tells the human side of our story, featuring rooted and empirical practitioners, communities inspired by whole food health, and the SP employees behind it all. These images should reflect natural authenticity, warmth, and an emotional resonance that inspires trust and credibility.

Subjects are shown in candid moments of focus, care, connection, and wellbeing. Lighting and color should always feel clean, natural, and warm. Avoid cropping subjects' heads unless framed in an intentional closeup composition.

Note that any photography from this document used in public-facing communications must be appropriately licensed prior to use.

Purchased & licensed images can be found on Brandfolder under Brand Evolution Photography:
<https://brandfolder.com/s/n838rsrkpgmknxwvqw44vj>

SECTION: 05

Graphic Devices

Dynamic Containers

Dynamic containers create a flexible system for framing imagery, color, and type within our visual identity. They bring bold expression and implied motion into layouts while organizing content and guiding hierarchy.

The curves of our dynamic containers are derived directly from the geometry of the Standard Process logo, creating a cohesive thread across the visual expression. Conceptually, the shapes represent a macro perspective of nature and systems working together, reinforcing the brand’s holistic view of health.

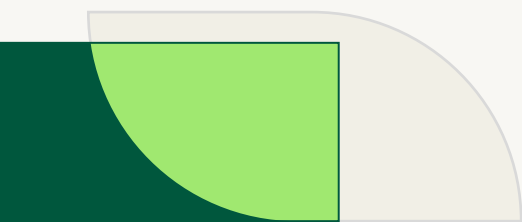

To create dynamic containers, crop one to two elements at a large scale within a layout. See the listed examples for a few ways dynamic containers can be constructed and composed.

Always use dynamic containers with care and restraint in layouts, never compromising an overall feeling of spaciousness and sophistication in the design.

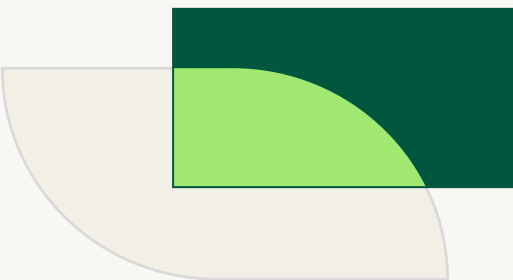

Dynamic containers and other graphic devices can be found on Brandfolder under Brand Evolution Design Elements:
<https://brandfolder.com/s/fbbsfzncb9jftkrg9mk6n64>

Example 04

Brand Icons

Inspired directly from the geometry of the logo, brand icons symbolize core ideas within Standard Process’s philosophy of whole food health. They’re best used together as visual accents working with typography to enhance brand storytelling.

Infographic linework

Subtle linework is a visual technique we use to bring an air of scientific precision and intentionality to our information-driven communications. These graphic devices are best used as understated photographic overlays to communicate product and ingredient details, stats, and benefits.
